

Side View

Distance from deck surface to bottom of 1500-mL is 16.39", however, an additional 5" of required space below bottom of soap bottle (when installed) to remove/install 1500-mL soap bottle (6-1/2" required for 2300-mL soap bottle).

Important: a 5-1/2" diameter column centered below spout is to be free and clear of obstructions (water stops, piping, drain, electrical, etc.) for complete installation and maintenance of soap dispenser (7" clearance for larger 2300-mL bottle).
